TOUCH SOLUTIONS

SCREENS AND PUSH BUTTONS

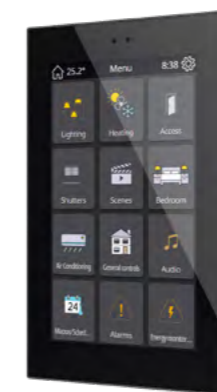

Z50

CENTRAL CONTROL

Touch screens with numerous functions ideal for centralised management of the entire home. Additionally, they offer remote control through the Zennio Remote App and integrate with the leading video intercoms on the market. All this with licensable functionalities: unlock the powers you need!

- WHITE
- SILVER
- ANTHRACITE

Z50

5" capacitive touch screen with a resolution of 480x854 pixels. Straight, elegant, and minimalist design, yet a powerhouse: in just 5 inches, complete control of the KNX installation is achieved. Thanks to licensable functionality, just like its counterparts, you can enjoy remote control, voice control, or integration with video intercoms.

Z70

7" capacitive touch screen with a resolution of 1280 x 800 pixels and the ability to accommodate up to 144 controls, distributed over 12 pages. There's nothing you can miss on this screen: inputs, temperature sensor, etc.; but above all, ease of use and an attractive, user-friendly interface that stands out for the clarity of the display.

Z100

"A 10" color touch screen with an impressive resolution of 1280x800. The highest range of Zennio's Z's can accommodate up to 180 controls to satisfy even the most demanding installations. With a sleek design, it adds a differential value to the room where it is located, providing an additional touch of glamour."

Z35

ROOM CONTROLLERS

Screens designed with the ideal number of functions to manage all necessary aspects in a room: lighting, blinds or climate, allowing complete control from a single place.

Their pronounced straight lines surprise with their perfect integration with any decor, as well as with the rest of Zennio's push buttons.

Z28

2.8" color touch screen. Its installation in 70x70 frames makes it a compact, discreet solution with a multitude of possibilities. Z28 allows installation in double frames of LS Jung or Zennio ZS70. Beauty and discretion.

Z35

3.5" color touch screen in a square format. Z35 has proven to be the best complement for any room, it's that screen that always sets the bar high. At the head of the bed, at the entrance of the room, as a thermostat in hotel rooms: wherever it is, Z35 is a good choice.

Z40

The 4.1" color touch screen blends in any environment, especially in those with Italian, American, or Australian push buttons, thanks to its possibility of installation both horizontally and vertically. A real powerhouse that adapts to any environment.

LOCAL CONTROL PUSH BUTTONS

The push buttons of the Flat and Tecla families have been carefully designed to improve the user experience. They are designed to be installed next to the element they control, whether it's lights, blinds, or sets of them in custom scenes or special environments.

The straight lines of these families, Flat and Tecla, harmonize perfectly with any space, adding a touch of elegance, modernity, and simplicity.

FLAT FAMILY

The Flat capacitive push-button family stands out for its high-quality glass finish. The flexibility offered by glass printing allows for unique designs not only with custom icons but also including full-color backgrounds, logos, or text.

TECLA FAMILY

Made of polycarbonate, Tecla push buttons are characterized by their attractive matte finish. Its wide selection of backlit icons allows for a level of customization that adapts to individual preferences.

Flat 55

Designed for installation in 55x55 frames and mechanisms, with a flush finish in the frame, Flat 55 is available in versions of 1, 2, and 4 buttons.

Flat 70

Perfect solution for integration into 70x70 frames. You can find Flat 70 in versions of 1, 2, 4, and buttons.

Flat X

With a square format, this device is available in versions of 1, 2, 4, and 6 buttons. Designed for independent installation, its profile of just 9.5 mm makes it discreet and elegant.

Flat XL

The XL format allows for 4, 6, 8, or even 10 controls. The possibility of vertical or horizontal installation makes it the optimal solution for Italian, American, or Australian installation boxes.

Tecla 55

With options of 1, 2, 4, or 6 buttons, Tecla 55 integrates perfectly with 55x55 frames and mechanisms. Its polycarbonate finish, when installed next to frames of the same material, makes it discreet and elegant.

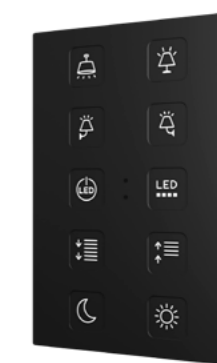

Tecla 70

Tecla 70 blends in with 70x70 frames and mechanisms. The polycarbonate finish together with the frame makes it an exquisitely integrated solution. Available in versions of 1, 2, 4, and 6 buttons.

Tecla X

With a square format and a slim profile of just 9.5 mm, Tecla is available in versions of 1, 2, 4, 6, and even 8 buttons. Designed for independent installation.

Tecla XL

Its rectangular design allows for 4, 6, 8, or even 10 controls. The possibility of vertical or horizontal installation makes it the optimal solution for Italian, American, or Australian installation boxes.

Z35

□ WHITE ■ SILVER ■ ANTHRACITE

Z28

In its 2.8" display, Z28 can accommodate an easy and intuitive thermostat interface for the user. Its installation in 70x70 frames makes it a compact solution, perfect for bed headboards.

Z35

3.5" color touch screen. Z35 incorporates an internal probe that monitors both temperature and humidity, ensuring total control of the environment where it is installed.

Z40

Z40 is an ideal thermostat for installations with Italian, Australian, or American boxes thanks to its horizontal installation possibility. It includes an internal temperature probe.

Flat 55 Display

An elegant and discreet thermostat for installation in 55x55 frames. With 4 buttons and a unique design thanks to the striking circular display.

Flat Display

A 2.4" display combined with 5 buttons. Its internal temperature and humidity probe make it a compact solution.

A bit more about Z28, Z35, and Z40...

- They allow displaying messages related to the climate or any other event on the screen for the user.
- Thanks to their navigable menus, they are much more than simple thermostats: lights, blinds, audio scenes... authentic all-in-one!
- The setpoint sliders change color to notify the user if the climate system is active, in cooling or heating mode...

**THERMOSTATS
21ST CENTURY**

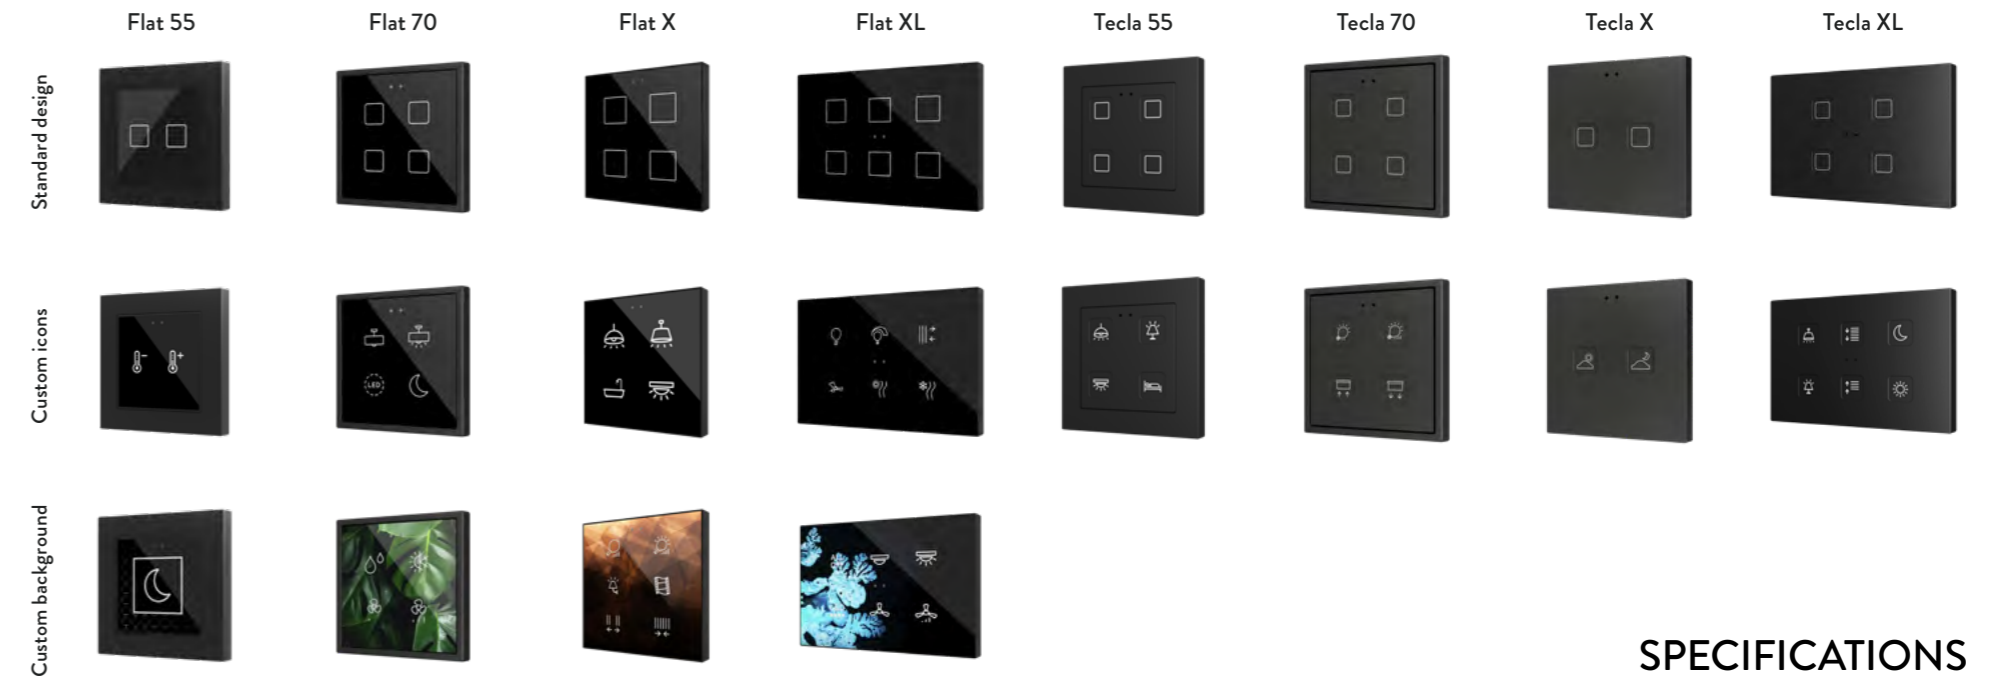

Say goodbye to the rotary thermostat!

It's time to make way for touch screens and push buttons with displays where the user can know the set temperature, whether the climate is active, or if the set temperature has been reached.

Interfaces designed by usability experts ensure that the user experience is exceptional.

Tecla X. Flush finish
